All those mentioned below received copies of Section 1.

This is the 1st of 4 sections. Each section will be provided they are completed.

Section 2 is anticipated to be provided in March/April. We anticipate that all four sections will be provided by September 2016.

Peter (CAG technical advisory) will be reviewing each section and communicating comments to the CAG. It may be helpful if a designated member of PHCC is in coordination with the CAG to participate in discussions with Peter on his review of each revised section of the FS then communicate back to members.

Thank you Kristine. And is this the first of several sections to be released sequentially to the PHCAG, Tribes, and our Coalition?

Cassie – This section has been revised to accurately, clearly, and concisely describe the background of the site, including the nature and extent of contamination, fate and transport of contamination, and conclusions of the baseline risk assessment (in short, a summary of the Remedial Investigation Report).

Thank you Alanna.

My major question is-- what are the most prominent changes that have been made to highlight?

Cassie,

Here are the draft final versions of the Portland Harbor Feasibility Study (FS) Section 1, which replaces Sections 1 and 2 of the draft FS, and Appendix A, which replaces Appendix R of the draft FS. The database was too large to send in an email, so we will send you a copy. Let me know if you have any questions and we'll set up a time to discuss.

Happy Reading!
